A dedicated and versatile professional with a unique blend of expertise in software development and health sciences. Currently completing a Bachelor of Health Science (Honours) degree in Health Information and Communication Technology, I bridge the gap between modern technology and holistic healthcare. My technical proficiency in programming, problem-solving, and software applications, combined with a deep academic and practical understanding of health information systems, positions me to contribute effectively to the digital transformation of the healthcare sector. Passionate about leveraging technology to enhance health communication, data management, and patient care outcomes, I am eager to apply my interdisciplinary skills in a dynamic and innovative environment.
